Case Study

Lori-Ann Sorvino

Directory of Transportation
Jericho UFSD, NY

Savino says the software platform is vital to maintaining an efficient operation.

“Transfinder saves a lot of time for us in the central office as we plan routes, but also for the drivers because it maximizes the efficiency of their routes. It’s a more educated way to manage school transportation.”

“If we had to manually reroute our buses repeatedly, it would take us weeks of work. Instead, we can do it quickly and easily. Honestly, I don’t know what we would do without Transfinder.”

Growing Together

Build

Route faster and more efficiently with tools that enable your team

Verify

Confirm your plan with integrated GPS comparative data

Enable

Share accurate data with drivers and district staff to stay aligned

Communicate

Once aligned internally share reliable data to parents

Maintain

Stay on top of the accuracy and efficiency of your operation

Success Through Implementation

Data Gathering

Securing your district's data early ensures that your environment reflects your operation

Training & Route Building

Your staff will work collaboratively with your dedicated Trainer learn and configure the software. Also given access to our extensive online library of resources.

System Testing & Integrations

Transfinder's best practice is to rollout every module of your system after adequate testing to ensure success.

1

Transfinder University 2-day course

2

Initial imports for:

- ❑ Student Data
- ❑ School Data
- ❑ Staff & Vehicles

3

One-on-One Training with dedicated trainer and building routes.

4

Configure imports, exports, and other automations

5

Route sheet, GPS, and parent email testing to prepare for going live
